Bioelectrochemistry and Bioenergetics 47 (1998) 359–364

BIOELECTROCHEMISTRY AND BIOENERGETICS

Subject Index of Volume 47

Absolute potential
The zero potential and Wilson's central terminal in electrocardiography (Okamoto, Mashima) 291
Ac-field-exposition
Cultivation of cells under strong ac-electric field—differentiation between heating and trans-membrane potential effects (Glasser, Fuhr) 301
Adrenodoxin
Direct electron transfer of adrenodoxin—a [2Fe–2S] protein—and its mutants at modified gold electrode (Jin et al.) 75
Affinity biosensors
Affinity biosensors based on solid supported lipid membranes. Their structure, physical properties and dynamics (Hianik et al.) 47
Alternative current polarography
Domains of human prothrombin embedded into vesicles: relation with biological activity (Lecompte, Elion) 57
Aluminum electrodes
High efficiency electrotransfection with aluminum electrodes using microsecond controlled pulses (Friedrich et al.) 103
Analysis
A new organic phase bienzymatic electrode for lecithin analysis in food products (Campanella et al.) 25
Applicators
Medical application of surface electromagnetic waves (Pchelnikov, Kholodnyi) 283
Attenuated total reflectance IR spectroscopy
Electrochemical behaviour of FAD and FMN immobilised on TiO_2 modified carbon fibres supported by ATR-IR spectroscopy of FMN on TiO_2 (Kubota et al.) 39

β-galactosidase
In vitro and ex vivo electrically mediated permeabilization and gene transfer in murine melanoma (Rols et al.) 129
Bacterial flagellar motor
An electrostatic model of the bacterial flagellar motor (Walz, Caplan) 19
Behaving rat
Fast glycolytic oscillations induced by potassium cyanide in the brain of behaving rats (potentiometric recording) (Shvets-Teneta-Gurii et al.) 143
Bienzymatic OPEE
A new organic phase bienzymatic electrode for lecithin analysis in food products (Campanella et al.) 25
Bioelectromagnetics
On the fetal magnetocardiogram (Peters et al.) 273
Biosensor
Electrochemistry of reconstituted glucose oxidase on carbon paste electrodes (Savitri, Mitra) 67
Blood
High magnetic field effects on human deoxygenated hemoglobin light absorption (Motta et al.) 297
Blood–brain barrier
Enhancement of anticancer drug delivery to the brain by microwave induced hyperthermia (Lin et al.) 259
Body surface Laplacian map
A simulation study of Laplacian ECG in a realistically shaped torso volume conductor: myocardial infarction (Wu et al.) 231
Body surface potential map
A simulation study of Laplacian ECG in a realistically shaped torso volume conductor: myocardial infarction (Wu et al.) 231
Brain
Fast glycolytic oscillations induced by potassium cyanide in the brain of behaving rats (potentiometric recording) (Shvets-Teneta-Gurii et al.) 143
Information encoding in the temporal aspects of electromagnetic fields consequent to human cortical neuronal activation (Roberts) 265
Breast cancer cells MCF 7
Electropermeabilization and electrofusion of human cells modified by anaesthetic agents (Velizarov et al.) 89
B16 tumor
In vitro and ex vivo electrically mediated permeabilization and gene transfer in murine melanoma (Rols et al.) 129

Calcium transport
Is the Ca^{2+} transport of human erythrocytes influenced by ELF- and MF-electromagnetic fields? (Glaser et al.) 311
Calmodulin
Electroporation induced gene expression—a case study on interleukin. -10. The Luigi Galvani prize lecture 1998 (Lehmann, Berg) 3
Cell killing
Effect of high voltage pulses on survival of Chinese hamster V79 lung fibroblast cells (Danfelter et al.) 97
Cells
A model for the detection of weak ELF electric and magnetic fields (Barnes) 207
Chemically modified electrode
Electrochemical behaviour of FAD and FMN immobilised on TiO_2 modified carbon fibres supported by ATR-IR spectroscopy of FMN on TiO_2 (Kubota et al.) 39
Coaxial probe
Dielectric properties of rat liver in vivo: a noninvasive approach using an open-ended coaxial probe at audio/radio frequencies (Raicu et al.) 325
Coil design
Functional magnetic stimulation: theory and coil optimization (Ruohonen et al.) 213

Coil shape
Functional magnetic stimulation: theory and coil optimization (Ruohonen et al.) 213
Cole–Cole function
Passive electrical properties of RBC suspensions: changes due to distribution of relaxation times in dependence on the cell volume fraction and medium conductivity (Fomekong et al.) 81
Computational chemistry
Thermochemiluminescence as a technique for radio frequency radiation dosimetry (Kiel et al.) 253
Conductance
Affinity biosensors based on solid supported lipid membranes. Their structure, physical properties and dynamics (Hianik et al.) 47
Conductivity
Dielectric properties of rat liver in vivo: a noninvasive approach using an open-ended coaxial probe at audio/radio frequencies (Raicu et al.) 325
Dielectric properties of rat liver in vivo: analysis by modeling hepatocytes in the tissue architecture (Raicu et al.) 333
Covalent immobilisation
Electrochemistry of reconstituted glucose oxidase on carbon paste electrodes (Savitri, Mitra) 67
Cyclic voltammetry
Direct electron transfer of adrenodoxin—a [2Fe–2S] protein—and its mutants at modified gold electrode (Jin et al.) 75
Investigation of the diaphorase reaction of ferredoxin-$NADP^+$ reductase by electrochemical methods (Madoz et al.) 179

Deceleration
Medical application of surface electromagnetic waves (Pchelnikov, Kholodnyi) 283
Delayed fluorescence
Thermochemiluminescence as a technique for radio frequency radiation dosimetry (Kiel et al.) 253
Desflurane
Electropermeabilization and electrofusion of human cells modified by anaesthetic agents (Velizarov et al.) 89
Developing rats
Interaction of low level modulated RF radiation with Na^+–K. $^+$-ATPase (Behari et al.) 247
Diaphorase activity
Investigation of the diaphorase reaction of ferredoxin-$NADP^+$ reductase by electrochemical methods (Madoz et al.) 179
Diazoluminomelanin
Thermochemiluminescence as a technique for radio frequency radiation dosimetry (Kiel et al.) 253
Dielectric breakdown
Cultivation of cells under strong ac-electric field—differentiation between heating and trans-membrane potential effects (Glasser, Fuhr) 301
Dielectric dispersion
Dielectric properties of rat liver in vivo: a noninvasive approach using an open-ended coaxial probe at audio/radio frequencies (Raicu et al.) 325
Dielectric modeling
Dielectric properties of rat liver in vivo: analysis by modeling hepatocytes in the tissue architecture (Raicu et al.) 333
Dielectrophoresis
The ac and dc electric field effects on photoreceptor rods of *Xenopus laevis* (Kovacs, Berg) 167
Dipole–dipole interaction
Dielectric properties of rat liver in vivo: analysis by modeling hepatocytes in the tissue architecture (Raicu et al.) 333
Direct current
Development of a dosage method for electrochemical treatment of tumours: a simplified mathematical model (Nilsson et al.) 11
Disc membrane
The ac and dc electric field effects on photoreceptor rods of *Xenopus laevis* (Kovacs, Berg) 167
Division rate
Cultivation of cells under strong ac-electric field—differentiation between heating and trans-membrane potential effects (Glasser, Fuhr) 301

ECG lead
The zero potential and Wilson's central terminal in electrocardiography (Okamoto, Mashima) 291
Electrical injury
Field-induced electroconformational damages in cell membrane proteins: a new mechanism involved in electrical injury (Chen et al.) 237
Electric field
Field-induced electroconformational damages in cell membrane proteins: a new mechanism involved in electrical injury (Chen et al.) 237
Is the Ca^{2+} transport of human erythrocytes influenced by ELF- and MF-electromagnetic fields? (Glaser et al.) 311
Electric fields
In vitro and ex vivo electrically mediated permeabilization and gene transfer in murine melanoma (Rols et al.) 129
A model for the detection of weak ELF electric and magnetic fields (Barnes) 207
Electric pulse
The ac and dc electric field effects on photoreceptor rods of *Xenopus laevis* (Kovacs, Berg) 167
Electrocardiography
A simulation study of Laplacian ECG in a realistically shaped torso volume conductor: myocardial infarction (Wu et al.) 231
Electrocatalysis
Electrochemical behaviour of FAD and FMN immobilised on TiO_2 modified carbon fibres supported by ATR-IR spectroscopy of FMN on TiO_2 (Kubota et al.) 39
Electrochemical treatment (ECT)
Development of a dosage method for electrochemical treatment of tumours: a simplified mathematical model (Nilsson et al.) 11
Electroconformational changes
Field-induced electroconformational damages in cell membrane proteins: a new mechanism involved in electrical injury (Chen et al.) 237
Electrodes
Direct monitoring of the field strength during electropulsation (Loste et al.) 119
Electrofusion
Electropermeabilization and electrofusion of human cells modified by anaesthetic agents (Velizarov et al.) 89
Electromagnetic field
Is the Ca^{2+} transport of human erythrocytes influenced by ELF- and MF-electromagnetic fields? (Glaser et al.) 311
Electromagnetic fields
Modelling of neuronal cells exposed to RF fields from mobile telecommunication equipment (Apollonio et al.) 199
Information encoding in the temporal aspects of electromagnetic fields consequent to human cortical neuronal activation (Roberts) 265
Electropermeabilisation
Effect of high voltage electrical pulses on subcutaneous glioma tumours on rats (Engström et al.) 163
Electropermeabilization
Electropermeabilization and electrofusion of human cells modified by anaesthetic agents (Velizarov et al.) 89

Mammalian cell electropermeabilization as revealed by millisecond imaging of fluorescence changes of ethidium bromide in interaction with the membrane (Gabriel, Teissié) 113
In vitro and ex vivo electrically mediated permeabilization and gene transfer in murine melanoma (Rols et al.) 129
Electroporation
Electroporation induced gene expression—a case study on interleukin. -10. The Luigi Galvani prize lecture 1998 (Lehmann, Berg) 3
Effect of high voltage pulses on survival of Chinese hamster V79 lung fibroblast cells (Danfelter et al.) 97
Mammalian cell electropermeabilization as revealed by millisecond imaging of fluorescence changes of ethidium bromide in interaction with the membrane (Gabriel, Teissié) 113
In vitro and ex vivo electrically mediated permeabilization and gene transfer in murine melanoma (Rols et al.) 129
Local transport regions (LTRs) in human stratum corneum due to long and short 'high voltage' pulses (Pliquett et al.) 151
Uptake of sensitizer by electroporated yeast cells (Wang et al.) 175
Electroporator
High efficiency electrotransfection with aluminum electrodes using microsecond controlled pulses (Friedrich et al.) 103
Electropulsation
Direct monitoring of the field strength during electropulsation (Loste et al.) 119
Electrostatic interaction
An electrostatic model of the bacterial flagellar motor (Walz, Caplan) 19
Electrostriction
Affinity biosensors based on solid supported lipid membranes. Their structure, physical properties and dynamics (Hianik et al.) 47
Electrotherapy
Development of a dosage method for electrochemical treatment of tumours: a simplified mathematical model (Nilsson et al.) 11
Electrotransfection
High efficiency electrotransfection with aluminum electrodes using microsecond controlled pulses (Friedrich et al.) 103
Electrotransformation
The effect of plasmid DNA sizes and other factors on electrotransformation of *Escherichia coli* JM109 (Szostková, Horáková) 319
ELF electric field
Effects of ELF electric field on proliferation of mouse osteoblastic cells (Tang et al.) 349
Energy deposition
Calculation of energy absorption in a human body model in a homogeneous pulsed high-frequency field (Šimunić) 221
Erythrocytes
Is the Ca^{2+} transport of human erythrocytes influenced by ELF- and MF-electromagnetic fields? (Glaser et al.) 311
Erythrocyte suspension
Passive electrical properties of RBC suspensions: changes due to distribution of relaxation times in dependence on the cell volume fraction and medium conductivity (Fomekong et al.) 81
Escherichia coli JM109
The effect of plasmid DNA sizes and other factors on electrotransformation of *Escherichia coli* JM109 (Szostková, Horáková) 319
Ethidium bromide
Mammalian cell electropermeabilization as revealed by millisecond imaging of fluorescence changes of ethidium bromide in interaction with the membrane (Gabriel, Teissié) 113
Exponential
Effect of high voltage electrical pulses on subcutaneous glioma tumours on rats (Engström et al.) 163

Fast kinetics
Direct monitoring of the field strength during electropulsation (Loste et al.) 119
Ferredoxin-$NADP^+$ reductase
Investigation of the diaphorase reaction of ferredoxin-$NADP^+$ reductase by electrochemical methods (Madoz et al.) 179
Ferrocenemethanol
Investigation of the diaphorase reaction of ferredoxin-$NADP^+$ reductase by electrochemical methods (Madoz et al.) 179
FES
Functional magnetic stimulation: theory and coil optimization (Ruohonen et al.) 213
Fetal magnetocardiogram
On the fetal magnetocardiogram (Peters et al.) 273
Fibroblast
Cultivation of cells under strong ac-electric field—differentiation between heating and trans-membrane potential effects (Glasser, Fuhr) 301
Field strength
Effect of high voltage pulses on survival of Chinese hamster V79 lung fibroblast cells (Danfelter et al.) 97
Finite element method
Calculation of energy absorption in a human body model in a homogeneous pulsed high-frequency field (Šimunić) 221
Flavin
Electrochemical behaviour of FAD and FMN immobilised on TiO_2 modified carbon fibres supported by ATR-IR spectroscopy of FMN on TiO_2 (Kubota et al.) 39
Fluorescence technique
Effects of ELF electric field on proliferation of mouse osteoblastic cells (Tang et al.) 349
Fluorescence video-microscopy
Mammalian cell electropermeabilization as revealed by millisecond imaging of fluorescence changes of ethidium bromide in interaction with the membrane (Gabriel, Teissié) 113
Food
A new organic phase bienzymatic electrode for lecithin analysis in food products (Campanella et al.) 25
Free radicals
Melatonin in the context of the reported bioeffects of environmental electromagnetic fields (Reiter) 135
Frequency
Information encoding in the temporal aspects of electromagnetic fields consequent to human cortical neuronal activation (Roberts) 265
Functional stimulation
Functional magnetic stimulation: theory and coil optimization (Ruohonen et al.) 213

Gating current
Field-induced electroconformational damages in cell membrane proteins: a new mechanism involved in electrical injury (Chen et al.) 237
Glioma cells
Effect of high voltage electrical pulses on subcutaneous glioma tumours on rats (Engström et al.) 163
GOD electrode
Electrochemistry of reconstituted glucose oxidase on carbon paste electrodes (Savitri, Mitra) 67
Gold electrode
Investigation of the diaphorase reaction of ferredoxin-$NADP^+$ reductase by electrochemical methods (Madoz et al.) 179

Hemoglobin
High magnetic field effects on human deoxygenated hemoglobin light absorption (Motta et al.) 297
High voltage
Effect of high voltage electrical pulses on subcutaneous glioma tumours on rats (Engström et al.) 163

High voltage pulses
Effect of high voltage pulses on survival of Chinese hamster V79 lung fibroblast cells (Danfelter et al.) 97
HMDE
Domains of human prothrombin embedded into vesicles: relation with biological activity (Lecompte, Elion) 57
Human skin
Local transport regions (LTRs) in human stratum corneum due to long and short 'high voltage' pulses (Pliquett et al.) 151
Human torso model
Calculation of energy absorption in a human body model in a homogeneous pulsed high-frequency field (Šimunić) 221
Hyperthermia
Enhancement of anticancer drug delivery to the brain by microwave induced hyperthermia (Lin et al.) 259
Hypo-osmolar media
High efficiency electrotransfection with aluminum electrodes using microsecond controlled pulses (Friedrich et al.) 103

5[^{125}I]-iodonaphthalene-1-azide
Domains of human prothrombin embedded into vesicles: relation with biological activity (Lecompte, Elion) 57
Impedance
Dielectric properties of rat liver in vivo: a noninvasive approach using an open-ended coaxial probe at audio/radio frequencies (Raicu et al.) 325
Impedance spectroscopy
Passive electrical properties of RBC suspensions: changes due to distribution of relaxation times in dependence on the cell volume fraction and medium conductivity (Fomekong et al.) 81
Temperature dependence of ionic transport through gramicidin A channels in liposomes: an EIS study (Vallejo et al.) 343
Interleukin-10
Electroporation induced gene expression—a case study on interleukin. -10. The Luigi Galvani prize lecture 1998 (Lehmann, Berg) 3
Intracellular Ca^{2+} concentration
Effects of ELF electric field on proliferation of mouse osteoblastic cells (Tang et al.) 349
Ionic channels
Modelling of neuronal cells exposed to RF fields from mobile telecommunication equipment (Apollonio et al.) 199
Ionic transport
Temperature dependence of ionic transport through gramicidin A channels in liposomes: an EIS study (Vallejo et al.) 343
Iontophoresis
Local transport regions (LTRs) in human stratum corneum due to long and short 'high voltage' pulses (Pliquett et al.) 151
Iron–sulfur protein
Direct electron transfer of adrenodoxin—a [2Fe–2S] protein—and its mutants at modified gold electrode (Jin et al.) 75

Joule heating
Direct monitoring of the field strength during electropulsation (Loste et al.) 119

K^+ channels
Field-induced electroconformational damages in cell membrane proteins: a new mechanism involved in electrical injury (Chen et al.) 237
KCN
Fast glycolytic oscillations induced by potassium cyanide in the brain of behaving rats (potentiometric recording) (Shvets-Teneta-Gurii et al.) 143

Lecithin
A new organic phase bienzymatic electrode for lecithin analysis in food products (Campanella et al.) 25
Light absorption
High magnetic field effects on human deoxygenated hemoglobin light absorption (Motta et al.) 297
Liposomes
Temperature dependence of ionic transport through gramicidin A channels in liposomes: an EIS study (Vallejo et al.) 343
Liver
Dielectric properties of rat liver in vivo: a noninvasive approach using an open-ended coaxial probe at audio/radio frequencies (Raicu et al.) 325
Local dissipation regions
Local transport regions (LTRs) in human stratum corneum due to long and short 'high voltage' pulses (Pliquett et al.) 151
Local heating
Local transport regions (LTRs) in human stratum corneum due to long and short 'high voltage' pulses (Pliquett et al.) 151
Local transport regions
Local transport regions (LTRs) in human stratum corneum due to long and short 'high voltage' pulses (Pliquett et al.) 151
Low-cost instrument
High efficiency electrotransfection with aluminum electrodes using microsecond controlled pulses (Friedrich et al.) 103
Lymphoma cells U 937
Electropermeabilization and electrofusion of human cells modified by anaesthetic agents (Velizarov et al.) 89

Magnetic
High magnetic field effects on human deoxygenated hemoglobin light absorption (Motta et al.) 297
Magnetic field
On the fetal magnetocardiogram (Peters et al.) 273
Magnetic field exposure
Melatonin in the context of the reported bioeffects of environmental electromagnetic fields (Reiter) 135
Magnetic resonance imaging
Calculation of energy absorption in a human body model in a homogeneous pulsed high-frequency field (Šimunić) 221
Mathematical modelling
Development of a dosage method for electrochemical treatment of tumours: a simplified mathematical model (Nilsson et al.) 11
Melatonin
Melatonin in the context of the reported bioeffects of environmental electromagnetic fields (Reiter) 135
Membrane
In vitro and ex vivo electrically mediated permeabilization and gene transfer in murine melanoma (Rols et al.) 129
Membrane capacitance
Dielectric properties of rat liver in vivo: analysis by modeling hepatocytes in the tissue architecture (Raicu et al.) 333
Membrane fluidity
Effects of ELF electric field on proliferation of mouse osteoblastic cells (Tang et al.) 349
Membrane fusion
The ac and dc electric field effects on photoreceptor rods of *Xenopus laevis* (Kovacs, Berg) 167
Membrane potential
Cultivation of cells under strong ac-electric field—differentiation between heating and trans-membrane potential effects (Glasser, Fuhr) 301
Methotrexate
Enhancement of anticancer drug delivery to the brain by microwave induced hyperthermia (Lin et al.) 259
Mice
In vitro and ex vivo electrically mediated permeabilization and gene transfer in murine melanoma (Rols et al.) 129

Micro-structure
Cultivation of cells under strong ac-electric field—differentiation between heating and trans-membrane potential effects (Glasser, Fuhr) 301
Millisecond imaging
Mammalian cell electropermeabilization as revealed by millisecond imaging of fluorescence changes of ethidium bromide in interaction with the membrane (Gabriel, Teissié) 113
Model
Modelling of neuronal cells exposed to RF fields from mobile telecommunication equipment (Apollonio et al.) 199
Modelling
On the fetal magnetocardiogram (Peters et al.) 273
Molecular wire
Electrochemistry of reconstituted glucose oxidase on carbon paste electrodes (Savitri, Mitra) 67
Monocytes
Electroporation induced gene expression—a case study on interleukin. -10. The Luigi Galvani prize lecture 1998 (Lehmann, Berg) 3
Myocardial infarction
A simulation study of Laplacian ECG in a realistically shaped torso volume conductor: myocardial infarction (Wu et al.) 231

N-Acetyltransferase activity
Melatonin in the context of the reported bioeffects of environmental electromagnetic fields (Reiter) 135
NADH
Electrochemical behaviour of FAD and FMN immobilised on TiO_2 modified carbon fibres supported by ATR-IR spectroscopy of FMN on TiO_2 (Kubota et al.) 39
NADPH
Investigation of the diaphorase reaction of ferredoxin-$NADP^+$ reductase by electrochemical methods (Madoz et al.) 179
Na^+–K^+-ATPase activity
Interaction of low level modulated RF radiation with Na^+–K. $^+$-ATPase (Behari et al.) 247
Neuromuscular rehabilitation
Functional magnetic stimulation: theory and coil optimization (Ruohonen et al.) 213
Neurons
Modelling of neuronal cells exposed to RF fields from mobile telecommunication equipment (Apollonio et al.) 199

Osteoblastic cells
Effects of ELF electric field on proliferation of mouse osteoblastic cells (Tang et al.) 349
Outer segment
The ac and dc electric field effects on photoreceptor rods of *Xenopus laevis* (Kovacs, Berg) 167

Peripheral nerves
Functional magnetic stimulation: theory and coil optimization (Ruohonen et al.) 213
Permittivity
Dielectric properties of rat liver in vivo: a noninvasive approach using an open-ended coaxial probe at audio/radio frequencies (Raicu et al.) 325
Dielectric properties of rat liver in vivo: analysis by modeling hepatocytes in the tissue architecture (Raicu et al.) 333
pH
Direct monitoring of the field strength during electropulsation (Loste et al.) 119

Photolabeling
Domains of human prothrombin embedded into vesicles: relation with biological activity (Lecompte, Elion) 57
Photoreceptor rod
The ac and dc electric field effects on photoreceptor rods of *Xenopus laevis* (Kovacs, Berg) 167
Pineal gland
Melatonin in the context of the reported bioeffects of environmental electromagnetic fields (Reiter) 135
Plasmid size
The effect of plasmid DNA sizes and other factors on electrotransformation of *Escherichia coli* JM109 (Szostková, Horáková) 319
Proliferation
Effects of ELF electric field on proliferation of mouse osteoblastic cells (Tang et al.) 349
Promoter
Electroporation induced gene expression—a case study on interleukin. -10. The Luigi Galvani prize lecture 1998 (Lehmann, Berg) 3
Propofol
Electropermeabilization and electrofusion of human cells modified by anaesthetic agents (Velizarov et al.) 89
Protein electrochemistry
Direct electron transfer of adrenodoxin—a [2Fe–2S] protein—and its mutants at modified gold electrode (Jin et al.) 75
Prothrombin-membranes interactions
Domains of human prothrombin embedded into vesicles: relation with biological activity (Lecompte, Elion) 57
Pulse length
Effect of high voltage pulses on survival of Chinese hamster V79 lung fibroblast cells (Danfelter et al.) 97
Pulses
Effect of high voltage electrical pulses on subcutaneous glioma tumours on rats (Engström et al.) 163

Radiators
Medical application of surface electromagnetic waves (Pchelnikov, Kholodnyi) 283
Radiofrequency radiation
Interaction of low level modulated RF radiation with Na^+–K. $^+$-ATPase (Behari et al.) 247
Radio frequency radiation
Thermochemiluminescence as a technique for radio frequency radiation dosimetry (Kiel et al.) 253
Rats
Effect of high voltage electrical pulses on subcutaneous glioma tumours on rats (Engström et al.) 163
Realistically shaped torso model
A simulation study of Laplacian ECG in a realistically shaped torso volume conductor: myocardial infarction (Wu et al.) 231
Redox-state potential oscillations
Fast glycolytic oscillations induced by potassium cyanide in the brain of behaving rats (potentiometric recording) (Shvets-Teneta-Gurii et al.) 143
Reference electrode
The zero potential and Wilson's central terminal in electrocardiography (Okamoto, Mashima) 291

Saccharomyces cerevisiae
Uptake of sensitizer by electroporated yeast cells (Wang et al.) 175
Short pulse
High efficiency electrotransfection with aluminum electrodes using microsecond controlled pulses (Friedrich et al.) 103
Signal-to-noise ratio
A model for the detection of weak ELF electric and magnetic fields (Barnes) 207
Slow-wave structures
Medical application of surface electromagnetic waves (Pchelnikov, Kholodnyi) 283

Solid supported membranes
Affinity biosensors based on solid supported lipid membranes. Their structure, physical properties and dynamics (Hianik et al.) 47
Specific absorption rate
Thermochemiluminescence as a technique for radio frequency radiation dosimetry (Kiel et al.) 253
Spectrometry
High magnetic field effects on human deoxygenated hemoglobin light absorption (Motta et al.) 297
Stainless steel electrode
Effect of high voltage electrical pulses on subcutaneous glioma tumours on rats (Engström et al.) 163
Static magnetic field
Is the Ca^{2+} transport of human erythrocytes influenced by ELF- and MF-electromagnetic fields? (Glaser et al.) 311
Surface electromagnetic waves
Medical application of surface electromagnetic waves (Pchelnikov, Kholodnyi) 283
Survival curve
Effect of high voltage pulses on survival of Chinese hamster V79 lung fibroblast cells (Danfelter et al.) 97
Swimming speed of bacteria
An electrostatic model of the bacterial flagellar motor (Walz, Caplan) 19

Temperature
Is the Ca^{2+} transport of human erythrocytes influenced by ELF- and MF-electromagnetic fields? (Glaser et al.) 311
Tetracaine
Electropermeabilization and electrofusion of human cells modified by anaesthetic agents (Velizarov et al.) 89
Therapy
Effect of high voltage electrical pulses on subcutaneous glioma tumours on rats (Engström et al.) 163
Thermal effects
Field-induced electroconformational damages in cell membrane proteins: a new mechanism involved in electrical injury (Chen et al.) 237
Thermal hazard
Calculation of energy absorption in a human body model in a homogeneous pulsed high-frequency field (Šimunić) 221
Thermochemiluminescence
Thermochemiluminescence as a technique for radio frequency radiation dosimetry (Kiel et al.) 253
Thiopyronine
Uptake of sensitizer by electroporated yeast cells (Wang et al.) 175
Tumour
Development of a dosage method for electrochemical treatment of tumours: a simplified mathematical model (Nilsson et al.) 11
Effect of high voltage electrical pulses on subcutaneous glioma tumours on rats (Engström et al.) 163
Tumour therapy
Effect of high voltage pulses on survival of Chinese hamster V79 lung fibroblast cells (Danfelter et al.) 97

V79 cells
Effect of high voltage pulses on survival of Chinese hamster V79 lung fibroblast cells (Danfelter et al.) 97
